Section 1
Overview of the Study

The Goals of this Study

On April 1st and 2nd, 2020, the Jefferson County Public Health Service, the Lewis County Public Health and the St. Lawrence County Public Health Department, partnering with the Center for Community Studies (the Center) at Jefferson Community College, invited adult residents of the three Northern New York counties to respond to a survey regarding COVID-19 (Novel coronavirus) impacts. The overarching goal of the survey study was to collect primary opinion and behavior data from residents to assist local health departments in better understanding the COVID-19 pandemic effects on the local community, identify priorities for action, understand key implementation challenges, track progress, and identify gaps between needs and services offered. The health departments will use these data to plan and monitor changes throughout the pandemic by completing the survey again periodically throughout the pandemic and tracking changes. Therefore, these data collected in the first week of April 2020 will simultaneously be used to both identify current levels of impact, as well as establish baseline levels against which future survey results may be compared to identify changes in impact upon residents.

Section 2
Methodology

A mixed-mode sampling methodology was employed in this study. A total of 2,076 North Country adult residents completed the survey. County-specific participation results were: Jefferson County (n=940), Lewis County (n=457), and St. Lawrence County (n=636). Four different sampling modalities were used in the mixed-mode design. Calling to a random selection from a list of all available landline telephone numbers for the three-county region resulted with 385 completed surveys. Calling to a random selection from a list of all available cellular phone numbers for the three-county region resulted with 250 completed surveys. A virtual remote call center was used in this study with 25 callers practicing social distancing by working remotely from their homes, calling phone numbers provided by the Center for Community Studies, using outgoing burner phone numbers provided by the Center for Community Studies, while using cloud-based survey software owned by the Center for Community Studies. All interviewers employed by the Center for Community Studies are experienced researchers who had been previously trained in both best interviewing practices as well as human subject rights law, and had worked on past studies completed by the Center. In addition to the phone interviews a random selection of available email addresses for residents of the three counties were sent an invitation to complete the survey online, resulting in another 1,188 completed surveys. Finally, to best-represent a historically difficult-to-access subpopulation of the North Country – the military members stationed at Fort Drum and their dependents – a fourth sampling modality was employed in this study where a link to the online survey was provided to the leadership at Fort Drum, who then posted the link, and an explanation and invitation to the survey, on several Fort Drum sponsored and related websites. These posted links collected an additional 253 respondents. In summary, the total of 2,076 participants were collected via – 635 (31%) telephone, 1,188 (57%) online email invitations, and 253 (12%) posted survey links on Fort Drum websites. Using the mixed-mode sampling methodology described above, the resulting participation rates for this study are considered very good among the industry standards of survey sampling. All calls were made between the hours of 4:00-9:00 pm on the evenings of April 1st and 2nd, 2020. The online versions of the survey were open for three days, April 1st through 3rd, 2020. To be eligible to complete the survey participants were required to be at least 18 years of age. No participant rewards, neither pre-incentives nor post-incentives, were used in this study. In both Lewis and St. Lawrence Counties the data were weighted toward population parameters within-county for age, gender, and educational attainment to adjust for nonresponse bias. In Jefferson County
a fourth weight was added, to additionally adjust for military affiliation representation. Results were calibrated within each county for sampling modality. Finally, region-wide three-county combined results have been additionally weighted for county population size. The result of these data curation processes is a design effect of 2.29, and an overall average margin of error of estimation for the three-county regional sample of 2,076 adults of ±2.6%. In accordance with the American Association of Public Opinion Research (AAPOR) Transparency Initiative pledge (the Center for Community Studies is a member of the AAPOR Transparency Initiative), the following details and disclosure for the telephone-interviewing and online surveying employed in this study, including the following characteristics and facts, should be considered by any reader:

1. **(T) Dates of Data Collection:** April 1 – April 3, 2020.

2. **(R) Recruitment:**
   - Telephone: All telephone participants were recruited to participate via telephone by random selection from a list of all available valid active residential and cellular telephone lines in Jefferson, Lewis, and St. Lawrence Counties, New York, USA.
   - Online (Email): Participants were recruited to participate via an email invitation with a link to the survey embedded.
   - Online (Link): Participants were recruited to participate via posting an invitation and a link on Fort Drum sponsored websites.

3. **(A) Population Under Study:** All adult residents of Jefferson, Lewis, and St. Lawrence Counties, New York, USA. There are approximately 260,000 residents in the counties. Approximately 190,000 of the 260,000 residents are adults, it is these adults who are the population of interest in this study.

4. **(N) List Source:**
   - Telephone: Electronic Voice Services, Inc., www.voice-boards.com
   - Online (Email): Bulk Email Superstore, www.contactai.com, and InfoUSA
   - Online (Link): None.

5. **(S) Sampling Design:**
   - Telephone: The entire phone list described in #2 was randomized, and 5,000 valid residential and cellular phone numbers were selected to contact to invite to participate in the survey.
   - Online (Email): The entire email address lists described in #4 were randomized, and approximately 15,000 email addresses of residents of Jefferson, Lewis, and St. Lawrence Counties, NY were selected to contact to invite to participate in the survey.
   - Online (Link): Participants were recruited to participate via posting an invitation and a link on Fort Drum sponsored websites.

6. **(P) Population Sampling Frame:**
   - Telephone: As described in #2, the sampling frame includes all available residential listed phone numbers, for adults in Jefferson, Lewis, and St. Lawrence Counties, NY, both landlines and cellular phones included.
   - Online (Email): As described in #5, the sampling frame includes all available email addresses of residents of Lewis County, NY.
   - Online (Link): Essentially only limited by Internet access, in theory all residents with web access in the counties are in the frame.

7. **(A) Administration:**
   - Telephone: Survey administered via telephone from a virtual remote call center in Northern New York, only in English, using SurveyMonkey as the CATI system.
   - Online (both Email and Link): Survey administered online from an email invitation, only in English, using SurveyMonkey.

8. **(R) Researchers:** The study was completed by the Center for Community Studies at Jefferson Community College, with funding completely provided by the College.

9. **(E) Exact Wording of Survey:** The survey instrument is attached as an appendix.

10. **(N) Sample Sizes:** As is discussed in much greater detail for this study above, and later in this report in Section 3.9: n=2,076 overall for the study, with an overall average margin of error of ±2.6%, including the design effect due to weighting.

11. **(C) Calculation of Weights:** County-specific results are weighted by gender, age, educational attainment, and military affiliation (only within Jefferson County), and regional aggregate results are then further weighted by county population sizes, with slight calibration of the results for sampling modality to address potential social desirability bias. Target weighting parameters are obtained from a combination of: the Fort Drum Plans, Analysis & Integration Office for military affiliation; and the U.S. Census for gender, age, and educational attainment.

12. **(Y) Contact Information:** Mr. Joel LaLone, Research Director, Center for Community Studies, contact information on page 3.
Generalizability and the Margin of Error – Constructing Confidence Intervals

With a sample of 2,076 completed surveys among North Country residents, data reported in this study for the entire North Country adult population will have an average margin of error of approximately \( \pm 2.6\% \), using a 95% confidence level and having included the design effect of weighting on that margin of error. If investigating only for one specific county, the margins of error will be larger. The county-specific average margins of error for this study are \( \pm 3.9\% \) in Jefferson County, \( \pm 5.5\% \) in Lewis County, and \( \pm 4.7\% \) in St. Lawrence County. These county-specific margins of error are larger than the region-wide margin of error of \( \pm 2.6\% \), of course, due to sample sizes within counties of less than 2,076.

Note that technically there is not one universal value of a margin of error that can be precisely calculated and used for the results for every question included in this survey, or for that matter, any multiple-question survey. Calculation methods used for generating a very precise measurement of the margin of error depend upon four factors. (1) The sample size is the number of participants who validly answered the survey question. In general, the smaller the sample size the larger the margin of error, and conversely, the larger the sample size the smaller the margin of error. (2) The sample proportion or percentage is the calculated percentage of the sample who responded with the answer or category of interest. This percentage can vary from 0%-100%, and, of course, will change from question to question throughout the survey. In general, the further that a sample percentage varies from 50%, in either direction (approaching either 0% or 100%), the smaller the margin of error, and conversely, the closer that the actual sample percentage is to 50% then the larger the resulting margin of error. (3) The confidence level used in generalizing the results of the sample to the population that the sample represented. In this study, the standard confidence level used in survey research, 95% confidence level, will be used for all survey questions. (4) The design effect (DEFF) is a factor used in the calculation of the margin of error that compensates for the impact upon the size of the margin of error that having a sample whose demographic distributions do not well-parallel the distributions of the entire population that the sampling is attempting to represent. In general, the further that the sample demographic distributions deviate from the population distributions then the larger the margin of error, and conversely, the closer that the sample demographic distributions parallel the population distributions then the smaller the margin of error. Essentially the design effect reflects the magnitude of the impact that reliance upon weighting of sample results will have upon the reliability of population estimates.

In mathematical notation, the margin of error (ME) for each sample result for this study would be represented as:

\[
ME = 1.96 \cdot \sqrt{\frac{p(100 - p)}{n}} \cdot \sqrt{DEFF}
\]

Where

- \( n \) = sample size = \# valid responses to the survey question
- \( N \) = population size
- \( p \) = sample percentage for the survey question (between 0%-100%)
- 1.96 = the standard normal score associated with the 95% confidence level
- \( DEFF \) = the design effect

and

\[
DEFF = \frac{n \cdot \sum w_i^2}{(\sum w_i)^2}
\]

with \( w_i \) = the poststratification weight associated with \( i \)th of the sampled individuals

Since subgroups of different sample size will be investigated throughout this report, the margin of error formula above has been applied for varying sample sizes and the average value of the margin of error (averaging across possible sample proportions) has been recorded below in Table 1.

Statistical Significance Tests

How does one determine if the observed difference in rates (or, percentages) when comparing subgroups is large enough to be statistically significant, or so small that it is not statistically significant? The rule that should be applied to determine statistical significance is:

1. Sample percentages in the same row and subtable (comparing demographic subgroups) not sharing the same subscript are significantly different at $p < .05$.
2. Sample percentages in the same row and subtable (comparing demographic subgroups) sharing the same subscript are not significantly different at $p < .05$.

All tests have been completed using the two-proportion z-test. Subsequent cell adjustment for all pairwise comparisons within a row of each innermost sub-table using the Bonferroni Multiple Comparison corrections has been completed when necessary. Tests assume equal variances. All results for all significance tests are reported in the associated cross-tabulation contingency tables using APA-style subscripts.

For example, the Northern New York County Comparison cross-tabulation for the first question in this survey “Have you been unable to get groceries that you need because they were not available?” for the three studied is shown below (and, also later in this report this is Table 3):

<table>
<thead>
<tr>
<th>Been unable to get groceries that you need because they were not available?</th>
<th>County of Residence</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Jefferson</td>
</tr>
<tr>
<td>Yes</td>
<td>43.5%&lt;sub&gt;a&lt;/sub&gt;</td>
</tr>
<tr>
<td>No</td>
<td>56.1%&lt;sub&gt;a&lt;/sub&gt;</td>
</tr>
<tr>
<td>Don’t know</td>
<td>0.4%&lt;sub&gt;a&lt;/sub&gt;</td>
</tr>
<tr>
<td>Total</td>
<td>100.0%</td>
</tr>
<tr>
<td>Unweighted County n</td>
<td>938</td>
</tr>
</tbody>
</table>

The cross-tabulation table above shows that 43.5% of Jefferson County participants respond with “Yes”, while the rates in Lewis and St. Lawrence Counties are 37.3% and 41.3%, respectively. Since these three groups all share a single subscript (a) there are no significant differences between the counties with respect to having been unable to get groceries that are needed because they were not available. The rates of responding “Yes” are not far enough apart to be unlikely to happen due to the random chance of sampling if the three counties are, in fact, not different. Therefore, the observed sample differences are not considered statistically significant. The above-described process is the appropriate process to use whenever comparing subgroups within the data set that has been collected and analyzed in this study.

Topline Summary of Study Findings
Section 3.1
Your Experiences So Far During the COVID-19 Pandemic

Our first questions are about things that North Country residents are experiencing due to the coronavirus. I will read you a short list, and for each item please tell me whether you have experienced the situation.

Figure 1 – Your Experiences So Far During the COVID-19 Pandemic (% "Yes")

- Been unable to get groceries: Jefferson 44%, Lewis 19%, St. Lawrence 26%
- Been unable to get prescription medication: Jefferson 2%, Lewis 2%, St. Lawrence 2%
- Been unable to get cleaning supplies: Jefferson 57%, Lewis 35%, St. Lawrence 37%
- Lost income from a job or business: Jefferson 35%, Lewis 19%, St. Lawrence 20%
- Felt more isolated and lonely than usual: Jefferson 57%, Lewis 52%, St. Lawrence 57%
- Felt more anxiety and nervousness than usual: Jefferson 57%, Lewis 62%, St. Lawrence 62%
- Find it difficult to provide child’s education at home (only among parents of school-aged children): Jefferson 45%, Lewis 52%, St. Lawrence 52%

Unweighted County n

- Jefferson: 376
- Lewis: 137
- St. Lawrence: 199
- County of Residence
- Are you finding it difficult to provide your children’s education at home?

---

Unweighted n

- Gender: 178
- Age Groups: 527
- Education Levels: 528
- Political Beliefs: 115
- Active military living in your household?: 565
Section 3.2
Changes in Lifestyle and Activities that May Mitigate Risk

With our next questions we are attempting to better understand activities that local residents may be involved in during these times of changed lifestyles. I’m going to read you a short list of 5 activities that you may have been involved in during the past two weeks. Please tell me how often you have done each of these things during the past two weeks. Please only consider your actions in person, not your actions through a phone call or via internet.

Figure 2 – Changes in Lifestyle and Activities that May Mitigate Risk

- Washed your hands for at least 20 seconds with soap and water or used hand sanitizer (% ≥3 times/day): Jefferson 94%, Lewis 94%, St. Lawrence 95%
- Worn a respiratory mask (homemade or store bought) when going out (% at least once in past 2 weeks): Jefferson 17%, Lewis 5%, St. Lawrence 19%
- Visited with friends inside your or their home (% at least once in past 2 weeks): Jefferson 29%, Lewis 27%, St. Lawrence 20%
- Visited with relatives inside your or their home (% at least once in past 2 weeks): Jefferson 35%, Lewis 54%, St. Lawrence 22%
- Performed family or personal errands away from home (% at least once in past 2 weeks): Jefferson 90%, Lewis 44%, St. Lawrence 86%
### Table 10

In the past two weeks, how often have you washed your hands for at least 20 seconds with soap and water or used hand sanitizer?

Section 3.6
Your Satisfaction with, or Confidence in, Leadership During this Pandemic

To better understanding the public's perception of how well or poorly our government and our public health departments have led us throughout this pandemic, we would like to know... how satisfied are you with the actions that __________ have taken in response to COVID-19?

Figure 6 – Your Satisfaction with, or Confidence in, Leadership During this Pandemic (% "Very or Somewhat Satisfied")

- United States public health leadership like the CDC: 67%, 67%, 67%
- President Trump and the US government: 54%, 54%, 54%
- Governor Cuomo and the New York State government: 66%, 60%, 59%
- Local County Public Health Departments: 63%, 75%, 68%

Section 3.7
Your Expectations as We Address the Coronavirus Pandemic in the Future

Finally, we are interested in better understanding the current expectations that residents have for the near future regarding COVID-19.

**Important Notes:**

Among the 2,076 participants in the three county region 1,258 provided at least one comment to this open-ended question. A content analysis of responses resulted with the data shown above, with 20 separate individuals independently reviewing and coding the qualitative comments. The results shown above are a meta-analysis of these 20 analyses. All percentages are calculated among those participants who provided at least one comment, therefore, a column may sum greater than 100% due to participants who provided more than one comment. If one is interested in reviewing the original transcripts/comments, please contact the Public Health Department.

Appendix
The Survey Instrument
Good evening. My name is (first name), I am calling from the Center for Community Studies at Jefferson Community College. We have been asked by the local public health departments to help collect data from North Country residents regarding the coronavirus, also known as COVID-19. They are interested in better understanding the impacts on local residents and using the results to make data-driven decisions locally. Do you have a few minutes to do a survey for us (or, “help us out”)?

If NO . . . Might there be another adult in the home who might wish to participate or is there a more convenient time to call?

If YES . . . (First verify that the person is 18 years old.) Great, well, let's begin.

**IMPORTANT - ESPECIALLY WITH CELL PHONES** - Verify that they do live in one of the three counties, if they do not then just thank them for their time and wish them a good day/evening.

**BE PREPARED TO EXPLAIN:**
- this call is NOT a call looking for a donation
- Public Health will use these data in their planning and decision-making,
- Public Health plans to continue to monitor and track throughout this pandemic to observe change and identify effective actions
- the survey is paid for by JCC, with the help of some local sponsors
- results will be available to the public for free in April 2020, from the local Public Health Departments
- your number has been randomly generated, we do not know who you are

**IF THEY ARE "ON THE FENCE":** "Would you like me to start with the first question, and you can stop the survey anytime you'd like?"

**READ THIS:**
Our first questions are about things that North Country residents are experiencing due to the coronavirus. I will read you a short list, and for each item please tell me whether you have experienced the situation.
"Have you ________________________, yes or no?"
(NEVER read the "Don't Know" choice aloud)

Q1. Been unable to get groceries that you need because they were not available?  
Q2. Been unable to get prescription medication that you need?  
Q3. Been unable to get cleaning supplies that you need, such as things like hand sanitizer, soap, toilet paper, or sanitizing wipes because they were not available?  
Q4: Lost income from a job or business?  
Q5: Felt more isolated and lonely than usual?  
Q6: Felt more anxiety and nervousness than usual?  

Q7: If you have school-age children at home, with schools closed now are you finding it difficult to provide their education at home?  
  ( ) "I have no school-age children in my home."
  ( ) Yes, it is difficult.
  ( ) No, it is not difficult
  ( ) Not sure

READ THIS:  
With our next questions we are attempting to better understand activities that local residents may be involved in during these times of changed lifestyles.

I'm going to read you a short list of 5 activities that you may have been involved in during the past two weeks. Please tell me how often you have done each of these things during the past two weeks. Please only consider your actions in person, not your actions through a phone call or via internet.

Q8. Washed your hands for at least 20 seconds with soap and water or used hand sanitizer?  
Q9. Worn a respiratory mask (homemade or store bought) when going out?  
Q10. Visited with friends inside your or their home?  
Q11. Visited with relatives inside your or their home?  
Q12. Performed family or personal errands away from home such as grocery shopping, going to the doctor, or taking the kids somewhere?
READ THIS:
With our next questions we are attempting to better understand exposure to the coronavirus in the North Country.

Q13. Do you personally know someone in your county who has tested positive for the coronavirus?

Q14. Are you definitely aware that you have been exposed to, or had contact with, a person who has the coronavirus?

* Our next questions relate to your current employment situation.

Q15: Which of the following best describes your current employment situation? (READ ALL CHOICES CAREFULLY, CHOOSE ONE.)

- You are retired.
- You were not employed before the recent coronavirus outbreak, and remain not employed
- You were employed full time before, and now you are not working at all
- You were employed part time before, and now you are not working at all
- You were employed full time before, and have had your hours cut.
- You were employed part time before, and have had your hours cut.
- You were employed full time before, and have remained working full time.
- You were employed part time before, and have remained working the same number of hours.

North Country COVID-19 Adult Community Survey (Phone - April 2020)

Further Items Among Those Who are Currently Working

Q16: Are you currently working remotely from home, or do you still go to your workplace?

- I'm working entirely from home now, and I was doing so before the coronavirus outbreak.
- I'm working entirely from home now, and this has been a change due to the coronavirus outbreak.
- I still go entirely to my workplace to work.
- I now work at home some, and go to my workplace some.
Among Those **Still Going to the Workplace**

**Q17:** If you still go to your workplace, how serious are your concerns about the safety of doing so? Do you have ....?

- Very serious concerns
- Somewhat serious concerns
- Minor concerns
- No concerns at all
- Not sure

**North Country COVID-19 Adult Community Survey (Phone - April 2020)**

**Your Occupation**

**Q18:** Which of the following describes your primary occupation? Do you work in, or own a business in, __________?

- Healthcare-related field
- Retail
- Food service
- Public safety (police, fire, corrections, etc.)
- Education
- Government
- Legal/Law
- Construction-related
- Service industries
- Clerical
- Military
- Agriculture
- Other (please specify)
READ THIS:
To better learn how public health leaders in the North Country may help residents, we are interested in better understanding your concerns.

"How serious are your concerns about .....?"

North Country COVID-19 Adult Community Survey (Phone · April 2020

Satisfaction with, or Confidence in, **Leadership**

READ THIS:
To better understanding the public's perception of how well or poorly our government and our public health departments have led us throughout this pandemic, we would like to know...
"How satisfied are you with the actions that ________ have taken in response to COVID-19?"
(be sure to probe for "very" vs. "somewhat")

Q28: Our United States public health leadership like the CDC?

Q29: President Trump and the US government?

Q30: Our Governor Cuomo and the New York State government?

Q31: Our local County Public Health Departments?

North Country COVID-19 Adult Community Survey (Phone - April 2020)

Your Expectations and Needs as We Address the Coronavirus Pandemic in the Future

READ THIS:
Finally, we are interested in better understanding the current expectations and needs that residents have for the near future.

Q32: Which of the following best describes your feelings about the coronavirus in our country? (READ FIRST THREE CHOICES)

○ Coronavirus is a major problem - but the worst is behind us.
○ Coronavirus is a major problem - and the worst is yet to come.
○ Coronavirus is not that major of a problem
○ Not sure

Q33: Which of the following concerns you more about responding to the coronavirus in America? (READ FIRST TWO CHOICES)

○ The US will go too far in limiting the movement and activities of Americans
○ The US will not go far enough in limiting the movement and activities of Americans
○ Neither/Not sure

Q34: Please describe what you feel is the single most important thing that North Country Public Health Departments and/or Economic development leaders could do to help you.
(Contact information will be provided at the conclusion of this survey if you need it)
Demographics

We are almost finished. These last few questions help us to get a better sense of whether the randomly selected people we are interviewing accurately reflects the characteristics of the general adult population of the North Country.

* AGE: I am going to read some categories of age classification. Please stop me when I get to the category in which your age falls.

- Teens
- Twenties
- Thirties
- Forties
- Fifties
- Sixties
- Seventies
- Eighty or older

* EDUCATION: I am going to read some categories relating to education. Please stop me when I get to the category in which your highest level of formal education falls.

- Less than a high school graduate
- High school graduate (include GED)
- Some college, no degree (include technical school)
- Associate Degree
- Bachelor's Degree
- Graduate Degree

POLITICAL BELIEFS: How would you classify your political beliefs? (read the list of choices)

- Very Conservative
- Conservative
- Middle of the Road
- Liberal
- Very Liberal
- Don't Know

* COUNTY: In which county do you reside?

- Jefferson
- Lewis
- St. Lawrence
Jefferson County Town/Villages:

**TOWN: In what Jefferson County village or township do you reside?**

- Adams (Adams Center)
- Alexandria (Alexandria Bay, Collins Landing, Plessis, Redwood, Wellesley Island)
- Antwerp (Oxbow)
- Brownville (Dexter, Glen Park)
- Cape Vincent
- Champion (Deferiet, Great Bend, West Carthage)
- Clayton (Depauville, Gindston Island)
- Ellisburg (Belleville, Mannsville, Pierrepont Manor, Woodville)
- Other (please specify)

- Henderson (Henderson Harbor)
- Hounsfield (Sackets Harbor, Sulfur Springs, Smithville)
- LeRay (Calcium, Evans Mills, Fort Drum)

**North Country COVID-19 Adult Community Survey (Phone - April 2020**

**St. Lawrence County Town/Villages:**
**TOWN: In what St. Lawrence County village or township do you reside?**

- Brasher (Brasher Falls, Helena)
- Canton (Crary Mills, Morley, Pyrites, Rensselaer Falls)
- Clare
- Clifton (Cranberry Lake, Newton Falls, Star Lake)
- Colton (Sevey, Sevey Corner)
- De Kalb (DeKalb Junction, Richville)
- De Peyster (Kokomo Corners)
- Edwards
- Fine (Wanakena)
- Fowler (Hailesboro, Emeryville, Balmat)
- Gouverneur
- Hammond
- Other (please specify) 

---

**North Country COVID-19 Adult Community Survey (Phone - April 2020)**

**Demographics Continued**

* **GENDER: If you don't mind me asking ... what is your gender?**

- Male
- Female
- Transgender
- Other (please specify) 

---

* **MILITARY AFFILIATION: Do you have one or more members of the active military living in your household?**

- Yes, me.
- Yes, but not me.
- No.
* Landline vs Cell:
Is the phone you are now speaking on a landline or a cell phone?

 IF ASKED: this information assists the Center in determining how representative this sample is of the entire population of the North Country.

☐ Landline  ☐ Cell phone

* PHONE OWNERSHIP:
Which of the following describes your phone ownership? You have....

☐ Both a Cell Phone and a Landline
☐ Landline only
☐ Cell phone only
